

USER MANUAL

NINZYA Timer

A lightweight countdown that stays where you need it

Time entry, five notification sounds, and NINZYA Ghost behavior in one compact window

Up to 99:59:59	5 notification sounds	Ghost display
----------------	-----------------------	---------------

macOS 11 or later / Windows 10 and 11 | Version 1.0.0

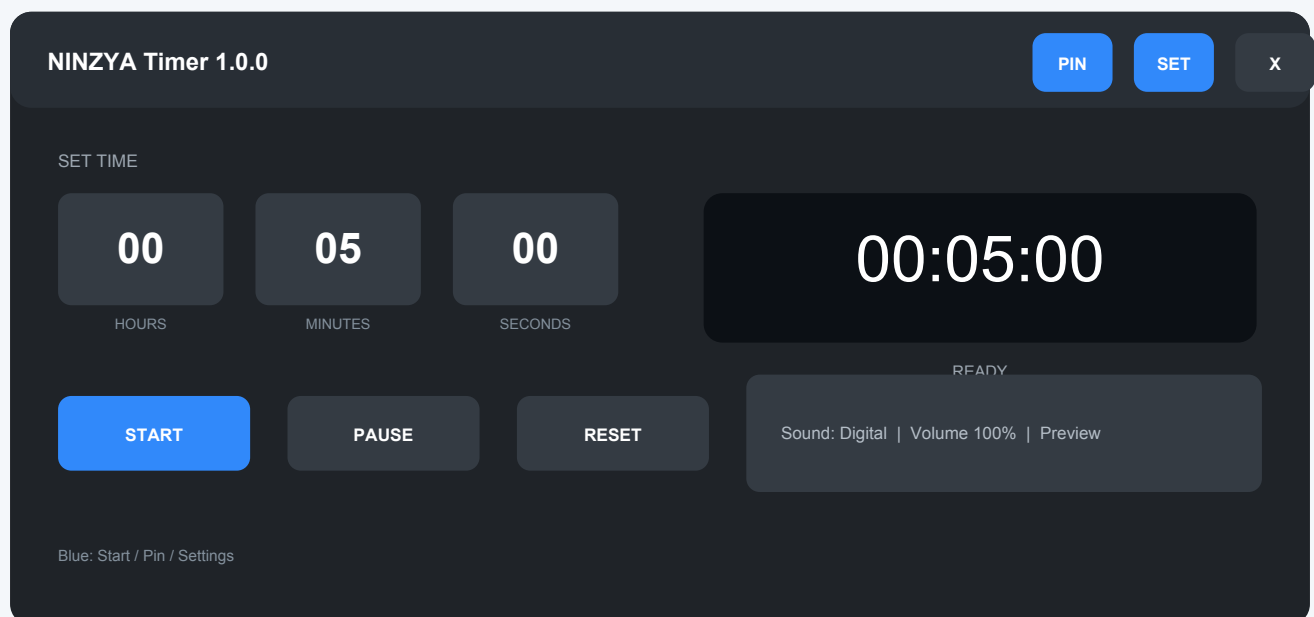

Getting started

NINZYA Timer is a lightweight countdown timer that can be set up to 99 hours, 59 minutes, and 59 seconds. Open the app to begin.

Launch the app

Platform	How to launch
macOS 11 or later	Open NINZYA Timer 1.0.0.app. On first launch, verify the source and filename.
Windows 10 / 11	Open NINZYA Timer 1.0.0.exe. If a warning appears, verify the source and filename.

Interface

Enter the duration at the top, monitor the remaining time in the center, and use the lower controls for start, pause, reset, and sound.

Set a time and start

- Enter digits from 0 to 9 in HOURS, MINUTES, and SECONDS. Use Tab or the arrow keys to move between fields.
- Select Start, press Enter, or press Space to begin the countdown.
- Select Pause to pause, then Resume or Space to continue.
- Select Reset or press Escape to return to the last configured duration.

States and available actions

Display	Meaning	Available actions
READY	Before start	Time entry / Start / Preview
RUNNING	Counting down	Pause / Reset
PAUSED	Paused	Resume / Reset
COMPLETED	Time reached zero	Reset / Enter a new duration

Accurate after sleep

The timer recalculates from its target end time. After screen lock, display sleep, or OS sleep, the next update restores the correct remaining time or Completed state.

Sounds and keyboard

Notification sounds

Choose from five completion sounds. Use Preview to listen, Volume to adjust level, and Mute to silence both completion playback and Preview.

Sound	Character
Bell	Clear bell tone
Chime	Gentle chime
Digital	Short digital tone
Beep	Direct beep
Soft	Subtle notification

Shortcuts

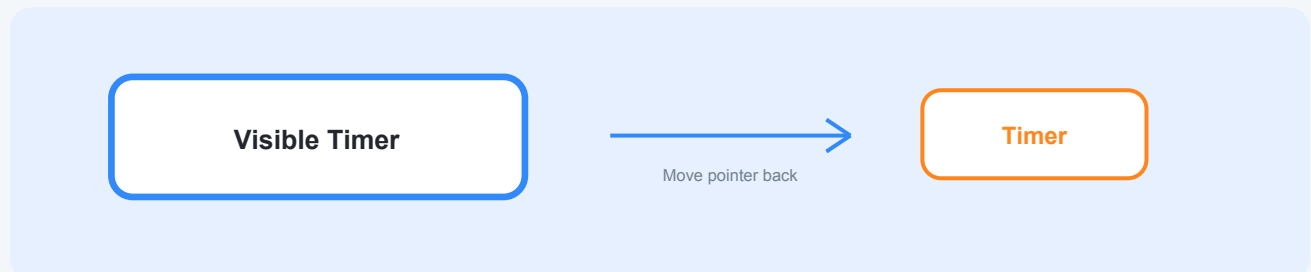

Action	Key
Enter time	0 to 9 / Numpad 0 to 9
Move between fields	Tab / Arrow keys
Start	Enter / Return
Start / Pause / Resume	Space
Reset	Escape
Ghost every NINZYA	macOS: Cmd + Shift + G / Windows: Ctrl + Shift + G

F12 is unassigned

F12 does not activate Hidden or Ghost. Use the operating-system shortcut above for Global Ghost.

Ghost and settings

When the pointer leaves the window, NINZYA Timer collapses into a small Ghost. Move the pointer back over the Ghost to restore the full window.

- Turn on Pin to keep the full window visible.
- The countdown continues while Ghosted and recalculates when the full window returns.
- Hold Shift while dragging a Ghost to move it without opening the full window.
- Overlapping Ghosts are moved to a nearby free position. Hover expansion waits while another unpinned NINZYA is visible.

Settings

Setting	Description
Ghost Scale	Ghost size from 10% to 80%.
Border Width	Ghost border width from 1px to 5px.
Label Font Size	Ghost label text size.
Border / Label	Border and label visibility. Both cannot be off.
Animation	Visible and Ghost transition animation.
Dark Theme	Switch between dark and light themes.
Border Color	Choose the Ghost border and label color from 12 colors.

Saving, quitting, and troubleshooting

What is saved automatically

The last configured duration, sound, volume, Mute, NINZYA settings, Pin state, and Visible/Ghost positions are saved automatically. A running countdown is not restored after the app quits.

Quitting

Selecting Close during an active countdown shows a confirmation. Choose Cancel to continue or Quit to close the app.

Troubleshooting

Issue	What to check
No sound	Turn off Mute, check Volume and the OS output device, then select Preview.
Window becomes small	Turn on Pin to keep the full window visible.
Cannot enter a time	In READY or COMPLETED, select a field and enter digits.
Need to move a Ghost	Hold Shift while dragging the Ghost.
Saved position is missing	Check connected displays and restart. The position is corrected into a visible area.
Active timer disappeared	Move the pointer over the Ghost. Timing continues after Global Ghost.
